

What are the signs that you're ready to break up with paper-based inductions?

**EVA**  
Check-in

- Chasing contractors & staff to complete inductions
- Running inductions at specific times only
- Lack of confidence in record-keeping
- Someone has to transcribe paper forms into digital systems.

This was the situation facing  
Marra Construction.

Their paper-based systems  
were costing them so much  
time and impacting their  
bottom line.

# Adopted EVA Check-in to manage site safety:

- Efficient digital inductions.  
Templated setup to get quickly underway.
- Workers self-report hazards in free app
- Easy QR code sign-in

# Results

- Set up each site in 15 mins
- Immediate improvements to processes without safety shortcuts
- Save 30 hours per week across the business.

**“When Site Managers say they love your software, you know you've made the right choice. EVA Check-in's safety tools have freed up about 30 work hours/week across our business while improving safety.”**

**Bradley Debnam, H&S  
Manager, Marra Construction**

**What could you save?**

**Is it time to break up  
with your paper-based  
H&S processes?**
